To bend wood, you need steam. The typical way to do this is to build a steam box that fits your part-to-be-bent inside. But there are three drawbacks to this method: The box must be sized to fit your piece; when you remove your piece from the box and transport it to your mold, it begins to cool, losing elasticity; and when not in use, the box takes up precious shop space.

The potential demolishing of the Clean Power Plan by the federal government in early October is looking like a losing fight in our war against carbon emissions at one of the biggest sources of these emissions. But we can continue to fight in this war and make an even bigger impact by focusing our efforts on the most ordinary and consistent thing in our modern lives; the buildings we live and ...

Abortion is extremely common. In America, for example, one in three women will have an abortion in their lifetime, yet the strong emotions sparked by the topic -- and the highly politicized rhetoric around it -- leave little room for thoughtful, open debate. In this personal, thoughtful talk, Aspen Baker makes the case for being neither "pro-life" nor "pro-choice" but rather "pro-voice ...
