Abstract. New advances in synthetic methodologies that allow rapid access to a wide variety of functionalized heterocyclic compounds are of critical importance to the medicinal chemist as it provides the ability to expand the available drug-like chemical space and drive more efficient

delivery of drug discovery programs.

Established in 1960, Advances in Heterocyclic Chemistry is the definitive serial in the area--one of great importance to organic chemists, polymer chemists, and many biological scientists. Written by established authorities in the field, the comprehensive reviews combine descriptive chemistry and mechanistic insight to yield an understanding of how the chemistry drives the properties.

Heterocyclic chemistry is an ever-expanding subject where scientists regularly discover new and exciting applications for heterocyclic compounds. The Journal of Heterocyclic Chemistry invites authors to submit heterocyclic chemistry research on any aspect of heterocyclic chemistry in the form of Articles, Notes, Reviews, and Communications.

Advances in Heterocyclic Chemistry is the definitive series in the field—one of great importance to organic chemists, polymer chemists, and many biological scientists. Because biology and organic chemistry increasingly intersect, the associated nomenclature also is being used more frequently in explanations.
