### Bodily Natures: Science, Environment, and the Material ...

In her book, Bodily Natures: Science, Environment, and the Material Self (Indiana University Press, 2010), Stacy Alaimo approaches the concepts of "science, environment, and self" in an extremely novel and inventive way. The central concept in Alaimo's work is that of "trans-corporeality" which she describes as a way of theorizing the relationship between humanity and the world at large as not being clearly delineated and separate, but as fluid.
