Business Capabilities Reference Model

A business capability defines "what" a business does at its core. This differs from "how" things are done or where they are done. Business capabilities are the core of the business architecture(i). Before I go further, let me say that this is not an article on the importance of the business capability or capability mapping.

THE ORGANIZATIONAL SYSTEMS MODEL

Business Capabilities Modelling (BCM) is the antithesis of the siloed model of governments past, because it offers a clearer view of each individual capability (composed of people, process, and technology) that allows the organization to better execute on its strategy.
