Step Definitions - Cucumber Documentation

Cucumber can be executed in parallel using TestNG and Maven test execution plugins by setting the dataprovider parallel option to true. In TestNG the scenarios and rows in a scenario outline are executed in multiple threads. One can use either Maven Surefire or Failsafe plugin for executing the runners.

Cucumber - Overview - Tutorialspoint

features2html is a simple script that creates HTML based documentation from Cucumber features. The resulting layout is also suitable for printing as PDF from your favorite web browser. Note that the documentation is generated from the source Cucumber feature files, and NOT from the test results (there are plenty of other tools that can do that).

Pickles - the open source Living Documentation Generator

Cucumber executes executable specifications written in plain language and produces reports indicating whether the software behaves according to the specification or not. Cucumber reduces the effort to keep requirements specifications, tests and documentation in sync - with Cucumber they are all the same documents - a single source of truth for everyone on the team.

Is there a test case documentation generator for cucumber ...

Cucumber is a testing approach which supports Behavior Driven Development (BDD). It explains the behavior of the application in a simple English text using Gherkin language. Selenium is an automation tool for Functional Testing of the web-based application. Selenium supports different language like ...

Documentation - SpecFlow - Cucumber for .NET

I like the idea of relishapp.com, i.e. that you have Cucumber / Gherkin features and you generate "living docs" from them. However, the Relish SaaS is awful.. I'm looking for an alternative. Ideally self-hosted Open Source like Sphinx, but I'm not completely opposed to SaaS solutions. Especially Sphinx would be great as I could combine it with other docs and use readthedocs.org for deployment.
