This manual contains the solutions to all 292 problems contained in Gas Dynamics, Third Edition. As in the text example problems, spreadsheet computations have been used extensively. This tool enables more accurate, organized solutions and greatly speeds the solution process once the spreadsheet solver has

Learning Objective:

This course is designed to introduce seniors and beginning graduate students to the fundamentals of compressible fluid flow, with an emphasis on a wide variety of steady, one-dimensional flow problems and a general understanding of the principles of multi-dimensional flow.
