The 1,450 cc Harley Davidson Engine, also known as the Twin Cam 88, was a breakthrough in motorcycle history when it came out. The engine was made and used on many different Harley Davidson bikes from 1999 to 2006. This engine has recently been retired and a new engine based on the 1,450 cc is being used in new Harley ...

with various unimaginable features that beat existing models.

### *Harley Davidson Twin Cam 88*

The Harley-Davidson Twin Cam are motorcycle engines made by Harley-Davidson from 1998 to 2016. Although these engines differed significantly from the Evolution engine, which in turn was derived from the series of single camshaft, overhead valve motors that were first released in 1936, they share a number of characteristics with nearly all previous Harley-Davidson engines.

### *Werkplaatshandboeken voor motoren: Harley Davidson*

Twin Cam 88 engines - Manufactured starting in 1999. The Twin Cam gets its name from the fact that it has two cams in the crankcase to activate the valves. At 88 cubic inches (1,450 cc) of displacement, it is the largest production Harley motorcycle engine, and it produces 80 horsepower.

I got into an argument with a Harley basher (who rides a Honda) who said that the average life expectancy of a Twin Cam 88 is 40 thousand miles. I argued, but had nothing to back it up. I've owned three Harley's and never had any engine (or trans) problems, but none of them have gone over 25K...

*Life Expectancy of a Twin Cam 88? | V-Twin Forum*

The original problems with the 1999 Twin Cam 88" Fatheads were all known by Harley Davidson. They sent out recall notices to everyone that gave a correct address. Those that got their bikes to the dealer or any Harley dealer had to leave the bike, then the dealer sent the engine back to Harley Davidson, it was replaced with a new engine.
