As major flooding
events around the

File Type PDF Hazards And The Built Environment Attaining British Resilience

world show, the impact of flooding on the built environment can cause widespread chaos.

These flood events form part of a wider pattern of increasing flood frequency coupled with increased vulnerability of the built environment to flood hazard.

AND RISK IN THE BUILT~~

File Type PDF Hazards And The Built Environment Achieving Built Resilience

Built Environment and Health Initiative CDC's National Center for Environmental Health (NCEH) is committed to protecting people from environmental hazards. NCEH responds to disasters and toxic exposures, educates communities on how to stay safe and healthy, and collects and leverages environmental data to improve public health.

organisation and representation. The sciences of the built environment cover architecture, urbanism, building technology, civil engineering, landscaping and the management of built stock mutations and operations.

~~Built environment~~
~~Wikipedia~~

A hazard is any agent that can cause harm or damage to humans,

File Type PDF

Hazards And The Built Environment

property, or the environment. Risk is defined as the probability that exposure to a hazard will lead to a negative consequence, or more simply, a hazard poses no risk if there is no exposure to that hazard. Hazards can be dormant or potential, with only a theoretical probability of harm.
