in high school science curricula. Occupational injury data from  
industry studies indicate that the injury rate is highest during the  
initial period of employment and decreases with experience.  
Similarly, in a high school laboratory setting where stu-dents  
experience new activities, the likelihood of incidents, injury, and  
damage is high.

reactions that pique student interest. Remember, although these experiments can be fun, students must always adhere to safety procedure. Here are a few fun experiments that can be employed in the high school ...

### *20 Chemistry Labs - New York Science Teacher*

Organic chemistry, one of five branches of chemistry, focuses on carbon-based chemical activity. Because all life requires carbon, organic chemistry and biochemistry are closely related. High school organic chemistry lab work begins with a review of lab safety, followed by practice performing basic lab techniques.

20 Chemistry Labs A share-a-thon is a place where teachers can voluntarily upload their files for other teachers to use. When a teacher submits a file, it is catalogued and placed into a database.

### *Laboratory Manual - Pearson Education*

Take the fear out of teaching high school chemistry; Lab Manual. I am a big proponent of lab manuals. Recording experimental procedure and observations are critical in scientific study. Teaching this helps not only obtain correct, reproducible results in your experiments, it helps with logic and reasoning skills.
