However, cross-cultural studies cross-nationally, 2 and among UK BME groups 3 are emerging. They clearly demonstrate that there are cultural differences in the type and prevalence of BPSD. 4 For example, anxiety and phobias occur at a lower prevalence among Indian subcontinent origin elders in the UK, and in the same group activity disturbance is associated with a diagnosis of Alzheimer's ...

Another important aspect of contextual cultural factors is self-construal. This term refers to an overarching schema that defines how people relate to others. Some cross-cultural researcher suggests that individuals from the US and other individualistic societies tend to construct and promote independent self-construals [12].
