Occupational exposure of hairdressers to hair dyes has been associated with the development of allergic contact dermatitis (ACD) involving the hands. p -Phenylenediamine (PPD) and toluene-2,5-diamine (PTD) have been implicated as important occupational contact allergens.

Self-reported work-related symptoms in hairdressers ...

Purpose: The prevalence of work-related musculoskeletal disorders is increasing worldwide. This survey aimed to evaluate the prevalence of leg pain among female hairdressers in Shiraz, Iran, in 2010.

Occupational Chemical Exposures Among Cosmetologists

Most professional hairdressers learn the trade through barbering or cosmetology schools. After completion, the hairdresser must obtain (and maintain) their state-issued license. The exception is shampooers, who are not required to have any formal training. Few people would ever associate hairdressing with occupational asbestos exposure. However, these workers often handled heated tools that contained asbestos insulation.

Occupational Exposures Of Hairdressers And

-499-. OCCUPATIONAL EXPOSURES OF HAIRDRESSERS AND BARBERS AND PERSONAL USE OF HAIR COLOURANTS 1. Exposure Data. 1.1 Introduction. Throughout history and across cultures, women as well as men have felt the need to change the natural colour of their skin, lips and hair, or to restore the colour of greying hair.

Exposure of hairdressing apprentices to airborne hazardous ...

Hairdressers, barbers and beauticians represent an important occupational group, with >800 000 people employed in the USA and ~1 million in Europe. 1.2 In the USA, this figure will grow 14% through 2016, faster than the average of all occupations. 1 These professionals are exposed to several thousands of chemicals contained in colorants, bleaches, shampoos and hair conditioners.

Occupational Exposures and Obstructive Lung Disease: A ...

Improved exposure assessment of chemical hazards in hair and nail salons is necessary to properly characterize occupational exposures and assess their potential health risks. Further studies on endpoints related to endocrine disruption and reproductive health outcomes among hair and nail salon workers are needed.

Hairdressers—Asbestos Risks, Products, Exposure & Lawsuits

Occupational Exposures of Hairdressers and Barbers and Personal Use of Hair Colourants; Some Hair Dyes, Cosmetic Colourants, Industrial Dyestuffs and Aromatic Amines. Show details IARC Monographs on the Evaluation of Carcinogenic Risks to Humans, No. 57.

OCCUPATIONAL EXPOSURES OF HAIRDRESSERS AND BARBERS AND ...

The majority of studies showing occupational reproductive effects among hairdressers and nail technicians suggest that chemical exposure is the probable cause of these findings (Ronda et al., 2009). However, the effects of exposures to mixtures of chemicals, such as those found in salons, are largely unknown ( Hougaard et al., 2006 ).
