Flexibility is a definite strength of live power amplifiers. You can push sound into these from virtually any source, and they'll make the speakers scream as loud as you like. Once your preamps do the delicate work of instrument and vocal signal processing, it's the job of the power amp to push that signal up into the hundreds or even thousands of watts - whatever level the cabinets demand.

Luxman's re-imagined NeoClassico series is appropriately costly but not saddled with a 'high-end' price, so at £2500 for the D-N150 CD/DAC and £3000 for the SQ-N150 integrated amp, it is not an alternative to, nor a substitute for a high-end, high-power system.

Power Amplifiers: The Source of Live Sound The American inventor, Lee de Forest, is credited with inventing the first power amplifier in 1909. And while de Forest spurned his father's hopes that he would become a pastor, there's irony in the fact that many of today's pastors rely on de Forest's invention every Sunday.

Power Amps | zZounds

DC power amplifiers are used to amplify the power of a PWM(Pulse Width Modulated) signals. They are used in electronic control systems which need high power signals to drive motors or actuators. They take input from microcontroller systems, increase its power and feed the amplified signal to DC motors or Actuators.

Power Amplifiers at Crutchfield

The power amp receives the signal from the preamp, amplifies it much further, colors it more (depending on the amp) and then sends it to the speaker(s). Some rigs have separate pre- and power amps. For example, there are many floor-based, pedal-type preamps for bass and guitar, which serve as the majority of the tone, and feeds into a power amp ...

Marantz Model 9 monoblocks Along with its less-expensive, lower-power, stereo brother, the Model 8B, Saul Marantz's legendary Model 9 was the best tube amp money could buy back in the 1960s. A 70W (40W in switchable triode mode) monoblock, it set the standard for liquidity and gorgeousness of timbre in its day—and to some diehards still does.
