## *Understanding and Evaluating Survey Research*

A questionnaire is a research instrument consisting of a series of questions for the purpose of gathering information from respondents. The questionnaire was invented by the Statistical Society of London in 1838. Although questionnaires are often designed for statistical analysis of the responses, this is not always the case. Questionnaires have advantages over some other types of surveys in that they are cheap, do not require as much effort from the questioner as verbal or telephone surveys, an

## *Questionnaire - Wikipedia*

Regardless of the type of survey, there are two key features of survey research: Questionnaires—a predefined series of questions used to collect information from individuals. Sampling—a technique in which a subgroup of the population is selected to answer the survey questions.
