Architectural conservation. Architectural conservation describes the process through which the material, historical, and design integrity of any built heritage are prolonged through carefully planned interventions. The individual engaged in this pursuit is known as an architectural conservator-restorer.

Historic preservation is wide-ranging,
spanning the public, private and
nonprofit sectors. Its essential nature is
multidisciplinary, requiring cooperation
across many fields, architecture, the
humanities, social sciences, the building
trades, law, economics and art history.

An Overview of Historic Preservation

Where To Download The Preservation Of Historic

Recognizing the need to protect such architecture, Congress enacted the National Historic Preservation Act (NHPA) in 1966. It basically requires the existence and continuance of historic buildings for the public benefit and heritage.

Historic preservation - Wikipedia

The preservation of historic buildings is a one-way street. There is no chance to renovate or to save a historic site once it's gone. And we can never be certain what will be valued in the future.

Sustainable Historic Preservation | WBDG - Whole Building...

Historic Preservation One of our primary focuses is on the preservation of historic buildings. We do more than simply restore old buildings or rehabilitate them for new uses; historic preservation is a philosophy derived from years of experience about how to respect the architectural integrity of historic buildings.

Preservation Briefs - Technical Preservation Services ...

Choosing an appropriate treatment for a historic building or landscape is critical. Preservation may be appropriate if distinctive materials, features, and spaces are essentially intact and convey the building's historical significance. If the building requires more extensive repair and replacement, or if alterations or additions are necessary for a new use, then Rehabilitation is probably the most appropriate treatment.

Governments Official

The Preservation of Historic Architecture:
The U.S. ...

Historic preservation is a movement in planning designed to conserve old buildings and areas in an effort to tie a place's history to its population and culture. It is also an essential component of green building in that it reuses structures that are already present as opposed to new construction.

Architectural conservation - Wikipedia

The historic buildings should be preserved, protected and renovated for future generations to come. Firstly, the buildings that were constructed in the previous era represent the history of the nation. For instance, it will inform how used people used to live previously.
