The tile view is available only on Windows XP and Windows Server 2003 when your application calls the `Application.EnableVisualStyle` method. On earlier operating systems, any code related to the tile view has no effect, and the `ListView` control displays in the large icon view. As a result, any code that depends on the tile view might not work correctly.

human muscle system | Functions, Diagram, & Facts | Britannica

Dynamic type checking is the process of verifying the type safety of a program at runtime. Implementations of dynamically type-checked languages generally associate each runtime object with a type tag (i.e., a reference to a type) containing its type information. This runtime type information (RTTI) can also be used to implement dynamic dispatch, late binding, downcasting, reflection, and ...

Fritjof Capra

4+1 is a view model used for "describing the architecture of software-intensive systems, based on the use of multiple, concurrent views". The views are used to describe the system from the viewpoint of different stakeholders, such as end-users, developers, system engineers, and project managers.

Structure & Function of the Digestive System: How it works

Question: In Microsoft Access 2007, how can I view system tables in the Navigation Pane? Answer: Right-click on the top of the Navigation Pane where it says "All Tables". Select "Navigation Options" from the popup menu. When the Navigation Options window appears, check the option called "Show System Objects". Then click on the OK button. Now, you should be able to see all system objects in the ...

4+1 architectural view model - Wikipedia

This point of view considers the system as a "black box", something that takes in input, and produces output, without us being able to see what happens in between. (in contrast, if we can see the system's internal processes, we might call it a "white box").
