VCarve Toolpath - VCarve Pro V9.5 Reference Manual

Note: In most cases, the left mouse button must be pressed in order to input a value (i.e.dragging to create a circle, dragging a vector to move it, or dragging one of the rotating/scaling points around a vector to rotate/scale it). The exception to this is the polyline tool: once the first point is entered the Quick Keys can be used without having to depress the left mouse key.
