Dick Swaab - Wikipedia

In *We Are Our Brains* Dick Swaab presents evidence that contradicts this belief, claiming that everything about us – including the diseases that will affect our minds – is present in our neuronal circuits long before we are born.

The benefits of realising you're just a brain | New Scientist

Left-brained people are said to be more logical, and right-brained people are said to be more creative. After a two-year analysis, a team of neuroscientists found no evidence to prove this theory. Brain scans showed that humans don't favor

Research. Through his years of research, Swaab, according to his own words, came to the deterministic and materialistic conclusion that brains are not things we have, but rather brains are what we are: the physical and chemical processes in our brains determine how we react and who we are. [citation needed] Currently,...
